Restoration of Fine Natural Stone and Tile

Lithofin® MN **EASY CARE** Instructions for Use

Lithofin® MN EASY CARE is a PH-neutral, acid-free, daily-use cleaner and conditioner. It is an excellent solution for use on all types of honed and textured stone, such as *Limestone, Slate, Travertine, honed Marble, honed Granite* and other stone with textured surfaces.

We recommend that Lithofin® MN EASY CARE be used ONLY on honed and textured surfaces.

NOTE: Lithofin® MN EASY CARE can be used on polished stone surfaces. However it does tend to leave streaks on the surface when dry.

Instructions:

FLOORS: Add 2 oz to 3 oz of MN EASY CARE to 1 gallon of clean, lukewarm water. Stir the solution vigorously until mixed well, creating bubbles. Using a clean mop, get the mop wet with the solution leaving plenty of the solution on the mop. Mop the floor evenly and let the solution air dry. Be sure to keep the ratio of MN EASY CARE and water as consistent as possible. We recommend that you use MN EASY CARE at least 2 to 3 times per week.

WALLS & OTHER SURFACES THAT CAN'T BE MOPPED: Add 1 oz of MN EASY CARE into a standard sized spray bottle and then fill the bottle with clean water. Mix the solution by gently shaking the spray bottle. Spray the solution on the stone surface allowing it to sit for a few minutes and then wipe the surface with a clean terrycloth rag.

For best results, we recommend that MN EASY CARE be used in tandem with Lithofin® MN POWER CLEAN on honed and textured stone surfaces. Using MN POWER CLEAN at last 4 times per month will help break down heavier dirt that MN EASY CARE may leave behind, keeping your stone clean for a longer period of time.
